# SPONSONS

## for all personal watercraft

Fitting WORX sponsons to your PWC will help get the boat on the plane faster and correct inline tracking. They will vastly improve your cornering, handling and performance in rough and choppy conditions or when towing skiers, wakeboarders and inflatables. Worx sponsons are easy to fit, look great and bolt right into stock mounting holes.

No one else has  
the range that  
**WORX** can offer!

# INTAKE GRATES

control & hook up

The WORX Maxiloader is the first mod anyone should do to their PWC. Among the benefits you'll receive are; reduced porpoising, no or minimal top speed loss (up to 3mph gain in choppy conditions!) and greater control & turning capability. As used by Pro & Amateur riders all around the world, Maxiloader grates set an industry performance standard.

# PERFORMANCE RIDE PLATES

## for all standups

With the help of WORX team riders in both Pro Ski and Freestyle, WORX has revolutionised handling with its Dominator ride plates a clear favorite for Yamaha and Kawasaki riders who want to improve cornering and all out handling. Our brand new Yamaha 2008 Superjet ride plate is testament to the fact that we never rest - we are continually looking for improvements in handling and performance. Put simply, WORX Ride Plates allow you to ride faster with less effort.

The very latest design in the Dominator range for the Kawasaki SX-R 800 this plate is all new with a wider tail section and two deep concaves to allow you to push harder into the corners, use the power of the Kawi to drive out of them in total control. It also incorporates our proven "D" cut out that is used in all of our ride plates.
